

Electronic Sites Supervision

Still having your sites supervision reports done manually?

We provide electronic sites visits supervision reports, to provide you with constant operational awareness

How It Works

- ✓ Supervisors verify site visit presence by tagging a clocking point mounted on each site
- ✓ Dates and times for each site visit are managed accurately by the system
- ✓ Site visit supervision reports are captured electronically using a mobile device, as guided checklist questions filled as a simple YES or NO, an optional comment, and optional images attached to each answer
- ✓ Site inspection checklists are easily maintained on a web portal
- ✓ Easily view and monitor all sites visits made by supervisors anytime and from anywhere using a Web Portal
- ✓ Receive real time email alerts whenever sites supervision visits are made and reports submitted, as well as daily sites supervision visits reports
